Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant suggested replacing the language regarding a "fixed molar ratio" with the specific numerical ranges disclosed in the specification. Applicant noted that since the prior art at best only teaches the general concept of mixtures and fails to disclose any specific amounts or ratios (or examples thereof), the claiming of a specific range would clearly overcome their teachings. Applicant also proposed that certain new dependent claims would contain functional limitations concerning their properties after in vivo administration, etc.
